3 December, 2022

Quest PENTHARA TECHNOLOGIES JPOWER4 Microsoft Athen. RAPID CIRCLE SOHO DRAGON ATNA TECHNOLOGIES

Session 6

Everything about SSO in Microsoft Teams

03:50 PM – 04:35 PM IST

SPEAKERS PANEL

Kunj Balkrishna Sangani

M365 consultant

LTIMindtree

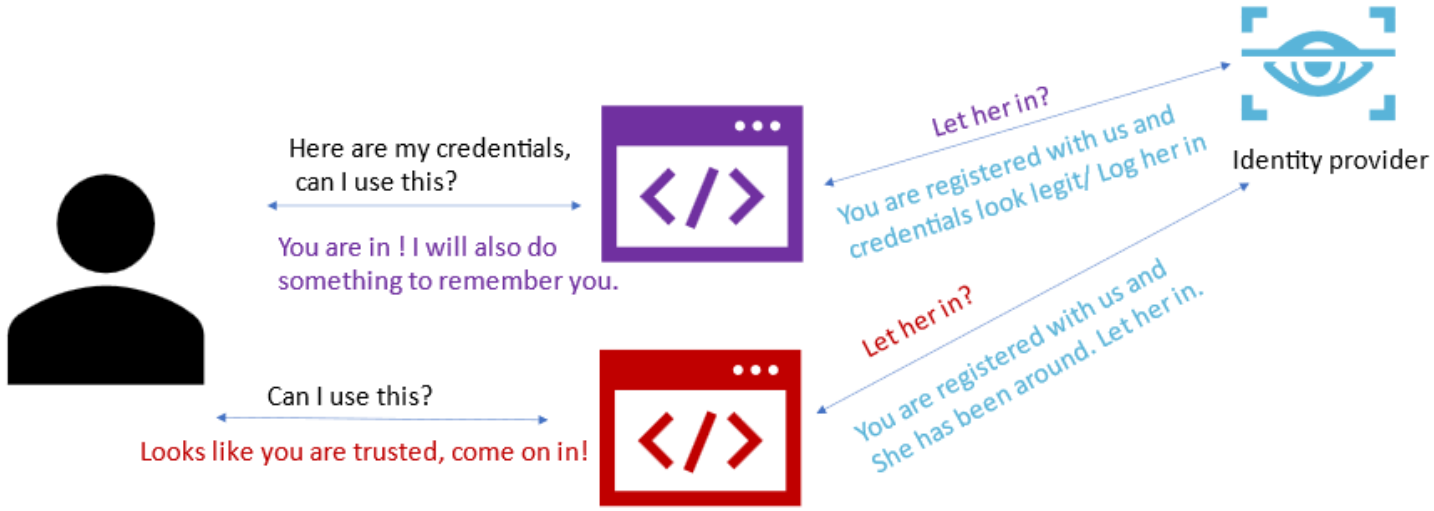
What we will learn

- What is Single sign on(SSO)?
- Why do we need SSO?
- What is Teams SSO?
- Microsoft Teams extensibility points
- SSO in Teams Tab
- SSO in Teams Bot
- SSO in Teams Message extension

You know nothing, Developer

What is Single sign on(SSO)?

Single sign on allows users to log in once with their credentials and access services without having to re-enter them over and over.



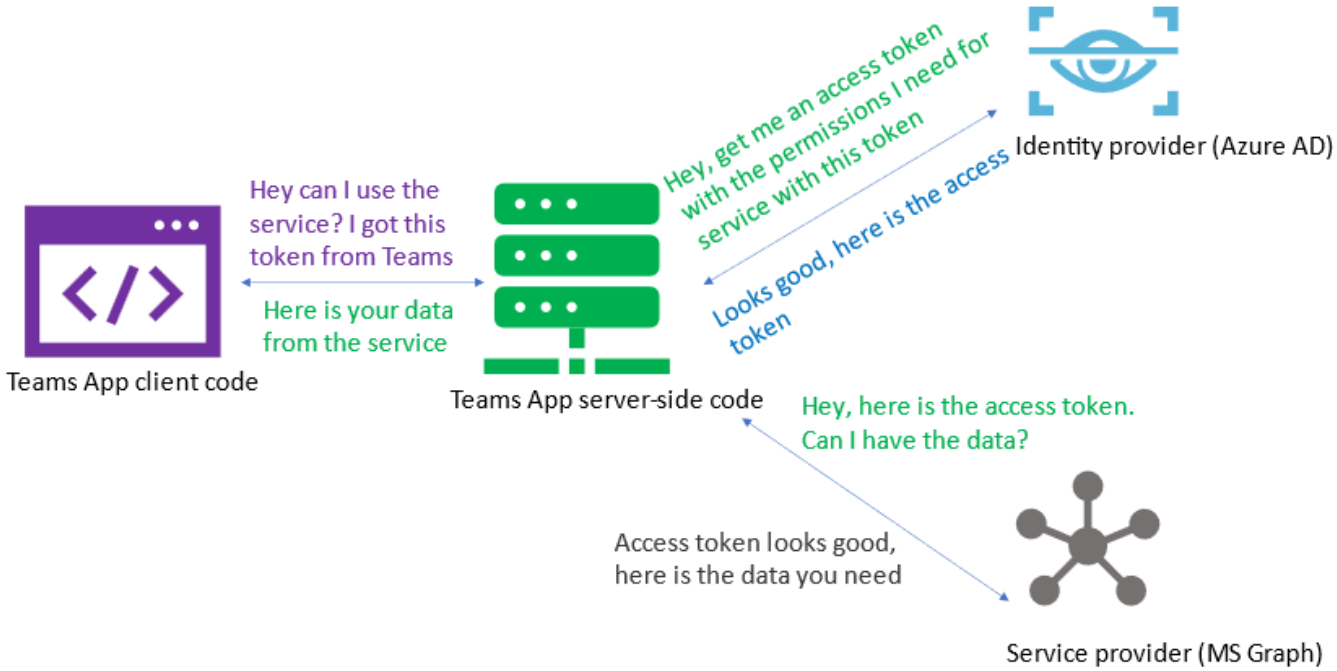
Why do we need SSO?

Applications that are interconnected yet independent often require users to login separately to access and use them. This often disrupts the overall usability of an app and the satisfaction of users.

No pop-up, no prompts and no need to sign in again and again

What is Teams SSO?

Teams SSO is when users can use a Microsoft Teams application with the same login they used when they signed into Microsoft Teams. The process is completely silent unless the application needs to ask the user to grant additional permissions.



Microsoft Teams extensibility points

- Tabs
- Bots
- Message Extensions
- Task Modules
- Meeting Extensions
- Cards

SSO for tab app
